[Society for Prevention Research 24th Annual Meeting](#) – May 31, 2016

Mobile Resources to Support Behavioral Health – topics include: suicide safe, know bullying, SAMHSA disaster app, Talk they Hear You. Click [here](#) for more information.

Drug and Alcohol Findings – Alcohol Research UK

Brief alcohol interventions not effective in real-world conditions

What has been recognised as the world's most successful effort to implement alcohol brief interventions across an entire health system had no significant impacts on the drinking of US ex-military personnel, seen as a prime example of the disappointing results of these interventions in real-world conditions.

15 Percent of Women Raped While Incapacitated by Alcohol or Drugs in Freshman Year – Journal of Studies on Alcohol and Drugs. Click [here](#) for press release.

The results of the 2015 Monitoring the Future surveys of 8th-, 10th-, and 12th-grade students were released on Wednesday, December 16, at 12:01am EST. ONDCP Acting Director Michael Botticelli, NIDA Director Nora Volkow, my colleague Richard Miech, and I participated in a follow-up teleconference for the press at 11am that day; please visit <http://goo.gl/4yDQwu> to listen to a podcast of the event.

The University of Michigan press releases, giving our take on this year's results, can be found here: <http://goo.gl/hJ0656>. One deals with our findings on e-cigarettes by American adolescents, and the other with their use of illicit drugs, alcohol, and various forms of tobacco. I think that you will find some of this year's results to be quite interesting.

We hope that this information is useful to your work. If you would like more information on the study, our website is www.monitoringthefuture.org. Many of our publications can be viewed and/or downloaded there. In addition, you can follow our program throughout the year on Twitter at: <https://goo.gl/V61omU> or on Facebook at: <https://goo.gl/intplz>. Email from Lloyd D. Johnston, Ph.D.

Today, [CDC's Division of Adolescent and School Health \(DASH\)](#) released the **2014 School Health Profiles (Profiles)** results on the DASH Healthy Youth website at www.cdc.gov/schoolhealthprofiles.

Teens Who See Others Drink, Use Drugs More Likely to Engage in Antisocial Behavior. The findings are published in the journal [Development and Psychopathology](#). Click [here](#) for press release.

National Drug & Alcohol Facts Week -The [National Institute on Drug Abuse](#) (NIDA) has released materials and resources for the 2016 National Drug & Alcohol Facts Week, which takes place January 25-31. For 2016, NIDA is partnering with the [NIAAA](#) to provide publications, event planning tools, promotion toolkits, and other resources for communities interested in participating in National Drug & Alcohol Facts Week. To learn more, click [here](#)

Teens are likely to try alcohol before they try either tobacco or marijuana, a new study concludes. The findings come from a study of 2,835 U.S. high school seniors by researchers recently published in the [Journal of School Health](#).
